👤 PROFILE

Full-Stack Software Engineer specializing in fintech platforms and enterprise integrations. Experienced in building multi-tenant banking systems, implementing AI/ML-powered financial analytics, and architecting scalable solutions for credit facilities and loan management. Proven track record delivering production-ready systems for major banks and enterprise clients.

🎓 EDUCATION

Addis Ababa University	09/2015 – 07/2020
<i>Bachelor's Degree in Software Engineering</i>	Addis Ababa, Ethiopia
CGPA - 3.87/4.0 (Very Great Distinction)	

👜 PROFESSIONAL EXPERIENCE

Quantum Technology PLC 🔗	07/2024 – Present
<i>Senior Software Engineer</i>	Addis Ababa, Ethiopia

- Lead Frontend Architect for QDL (Quantum Digital Lending), a multi-tenant system built with Next.js 14 and TypeScript; designed a scalable architecture to support 7 major Ethiopian banks within a single codebase.
- Engineered a production-ready Credit Scoring Engine using Django and PMML, implementing automated business rules and loan limit calculations; containerized the stack via Docker for streamlined production deployment.
- Developed a comprehensive Analytics & Reporting system for Mkopo Easy (Kenya) using React 19 and TanStack Query, featuring interactive visualizations for Portfolio at Risk (PAR) and merchant performance metrics.
- Designed a robust Role-Based Access Control (RBAC) framework and a reusable UI component library, ensuring secure data isolation and frontend consistency across all fintech products.

Creditit 🔗	08/2025 – 01/2026
<i>Full-Stack Developer (Remote)</i>	Dubai, UAE

- Developed NetSuite ERP integration for major logistics client, enabling automated synchronization of customer invoices and payments while refactoring over 2,000 lines of legacy code to enhance system maintainability.
- Integrated machine learning payment prediction models with automated customer history generation using Python and R; implemented credit scoring system and seasonal revenue forecasting for AI-powered financial assistant.
- Engineered real-time financial calculation engines for borrowing base management, risk-based concentration limits, and automated draw request processing in invoice financing operations.
- Implemented dynamic Mistral OCR bank statement processing system with schemas for multiple UAE banks; built React/TypeScript facility configurator and operations dashboard.

Yaltopia Software Technology PLC

Software Engineer (Part-time)

11/2023 – 07/2024

Addis Ababa, Ethiopia

- Developed a comprehensive Employee Management System to facilitate the recruitment, deployment, and management of employees from a specific country, involving coordination with recruitment agencies, sponsors, and international employers.

Alphabet Trading PLC

Full-Stack Engineer

01/2021 – 04/2024

Addis Ababa, Ethiopia

- Designed and developed professional websites for Alphabet Trading PLC and Lucid Pictures PLC, enhancing online presence and brand visibility
- Contributed to inventory management system development, streamlining inventory tracking and reducing operational inefficiencies
- Developed Construction Management System to enhance project outcomes by centralizing project information and integrating workflows

A2SV

Web Development Team Lead

08/2020 – 03/2021

Addis Ababa, Ethiopia

Led a web development team of high-potential engineers to build scalable digital solutions, directing project scope and technical milestones

SKILLS

Languages

Python, TypeScript, JavaScript, SQL

Frontend

React, Next.js, TailwindCSS, TanStack Query

Backend

Django, Flask, FastAPI, Node.js, SQLAlchemy,
PostgreSQL, Redis

DevOps & Tools

Docker, Git, AWS
